

# Hybrid Absorber

raymond **emc**

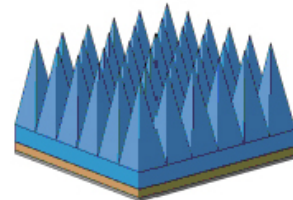

## Description

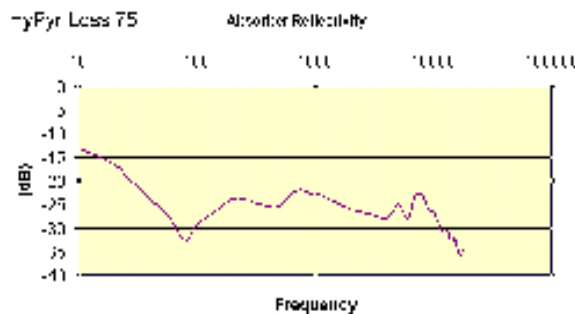

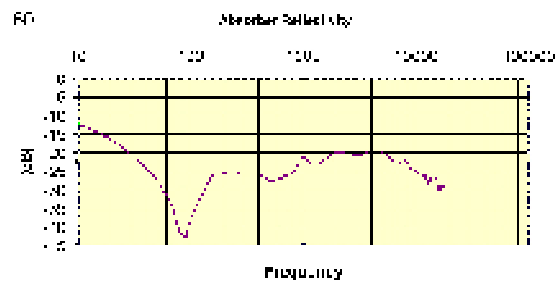

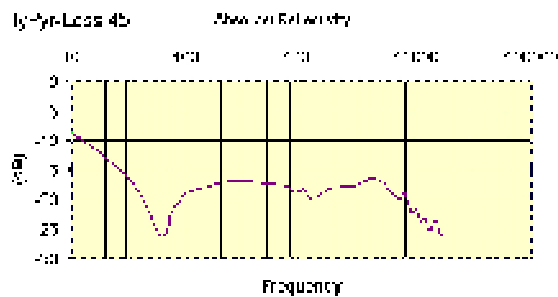

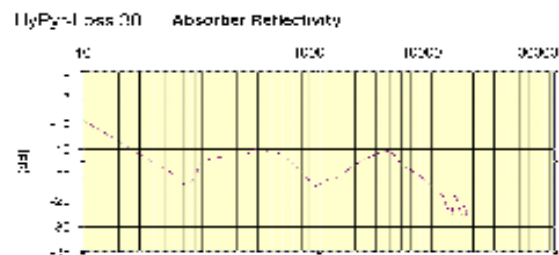

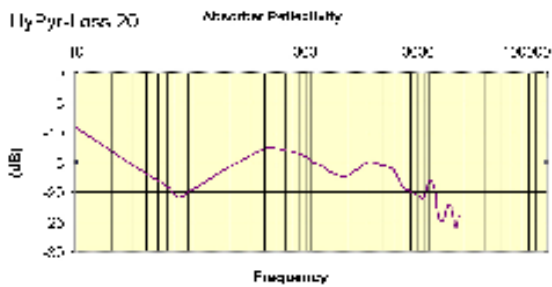

RF absorber is utilized to reduce reflections within an RF shielded enclosure

## Features

High-performance, low frequency dielectric absorbers
Incorporates a tuned ferrite absorber with a precision matched urethane pyramidal absorber
Reflectivity performance from 20 MHz to 20 GHz
Absorber are flame resistant and fire retardant

## Specifications

Sales: 800-EMC-1495 X330  
Tel: 613-841-1663 X330  
Fax: 613-841-0456
