

# Automation Modules

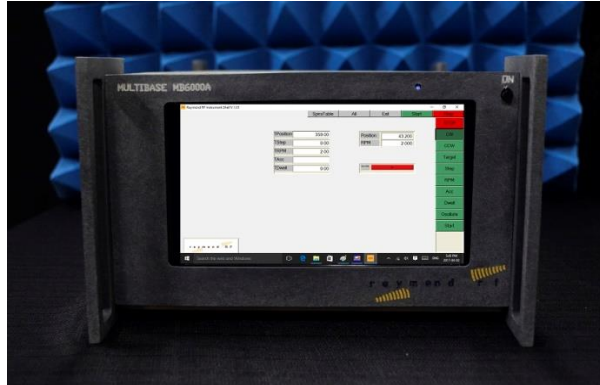

## Description

Raymond RF's Automation Modules are supported by our MultiBase Controller. With the optional GPIB Interface, it can be seamlessly integrated into an industry standard Automation, EMC or Antenna Measurement System.

## Features

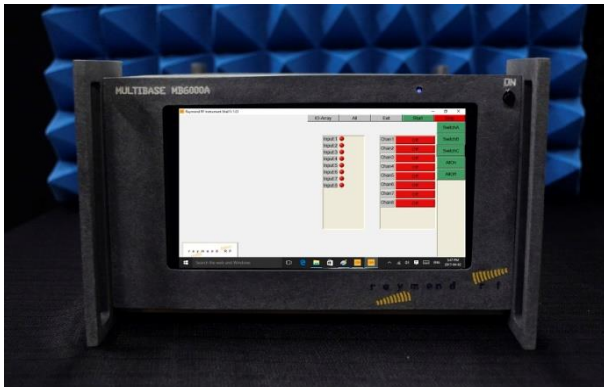

- Modular Designed Software linked with
  - TCP/IP
  - Customizable GPIB Commands
  - Software upgradeable with USB flash drive
  - Can control up to 6 modules
  - Turntable Controller
  - Antenna Mast Controller
  - Antenna Positioner Controller
  - I/O Relay Array
  - EMC Camera Controller

## Turntable and Positioner Module

- Controls all Raymond RF Positioners

## IO Relay Array Module

- 8 Isolated dry contact inputs
- 8 Isolated Output Relays rated for 10Amp 120VAC

## EMC Camera Controller Module

- Controls Raymond RF EMC Cameras
- OEM Camera Software Interface

## Options

- Industry compatible GPIB Interface. Designed for Commercial Measurement Software
- USB Keyboard & Pointing Device
- Rack mount kit for 1/2 width or full width 19" rack
